

ITI Group Acquires Specialist Engineering Services firm Noveum

Strategic Acquisition Fuels Expansion in High-Growth Nuclear Sectors

News Release

For immediate release

19 November 2025

Leading international systems integrator, ITI Group (ITI) today announces the acquisition of nuclear engineering services specialist Noveum Ltd (Noveum). The acquisition provides ITI expanded design and safety systems expertise, reinforcing its role in the evolving nuclear enterprise landscape.

The acquisition strengthens ITI's civil and defence nuclear capabilities and boosts capacity with a significant number of additional Suitably Qualified and Experienced Personnel (SQEP). It comes at a time when these sectors are undergoing a period of rapid expansion with increased investment and demand for specialist services in support of the UK government investment plans. With these expanded capabilities, ITI offers integrated solutions spanning the full nuclear enterprise lifecycle, enhancing value from conceptual design through to sustained operations

Dominic Murphy, ITI Group's CEO commented: "We're delighted to welcome the Noveum team to ITI Group. We have long admired the business and the reputation it has developed in the nuclear sector. Having been proud to support national critical infrastructure for over 50 years, ITI Group and now with Noveum, offer a complete service to these sectors where growth is accelerating.

The timing is strategic: as the UK targets 24GW of nuclear power by 2050 and ramps up defence investment, ITI and Noveum are joining forces to meet this rising demand. The depth of engineering knowledge and experience available is required to support and drive safety and efficiency improvements into our clients' operations.

Noveum Managing Director, Roger Turner said of the acquisition: "The nuclear sector is undergoing a renewed period of development. By combining the capability of these two businesses, we will be well placed to better service the ever-growing civil and defence nuclear enterprise sectors for control and safety systems in the industry."

ITI Group Chairman, Mark Hardy comments: “The UK’s 2050 nuclear ambitions and post-review defence commitments mark a surge in opportunity — and ITI’s acquisition of Noveum positions it to take a leading position in this important sector”

The acquisition further cements ITI Group’s position as an independent international leader in systems integration for industrial applications in civil and defence nuclear enterprises, life sciences, manufacturing, power and utilities, renewables, warehousing and oil and gas.

NOTES TO EDITORS

About ITI Group

ITI Group helps business enable their critical facilities with integrated intelligent systems that securely unify the operational and digital worlds providing safer, more resilient, smarter, more profitable and more sustainable operations.

The group develops solutions for civil and defence nuclear enterprises, life sciences, manufacturing, power and utilities, renewables, warehousing and oil and gas. An independent technology specialist with over 50 years of deep domain expertise, ITI Group provides design, development, real-world implementation and full life-cycle support to meet ever-changing operational and environmental demands.

At the heart of ITI Group is a complete commitment to innovation and transformation. Our people are practical, insightful and dynamic with a personal approach.
